Experience

Edunext Technologies Pvt. Ltd. Delhi NCR, India

Software Engineer Intern - AI Powered Analytics Systems *Apr 2026 – May 2026*

- Developed an **AI-powered finance analytics platform** for a multi-tenant enterprise deployment, integrating Power BI dashboards with the chatbot, architected as a **LangGraph state-machine pipeline** with conditional rule-based/LLM-fallback routing to balance reliability and flexibility in a live business system.
- Designed and tested 10+ scalable FastAPI endpoints (validated via Postman) and JSON-based data pipelines to process **50,000+ student fee records**, enabling dynamic queries across business-critical processes including collections, concessions, waivers, and pending fees.
- Implemented intelligent query planning with LangChain structured LLM output, a deterministic RapidFuzz-based typo-correction layer, and context-aware follow-up handling, reducing manual reporting effort by 80% across a multi-tenant deployment spanning **20+ clients organizations** in India.

IEEE Bangalore Section Bangalore, India

Artificial Intelligence Intern - OncoVision-Early Cancer Detection *Apr 2025 – Jul 2025*

- Developed a dual-output deep learning model using EfficientNetB0 to classify eight cancer types and detect malignancy from histopathological images.
- Achieved **97.99% accuracy** in cancer classification and **98.13% in malignancy detection** through transfer learning, regularization, two-phase training, and performance evaluation (accuracy, precision, recall) across transfer learning configurations.

Projects

MedReasonAI-Agentic Multimodal System for Disease Diagnosis | **GitHub** Jul 2026 – Present

Python, PyTorch, DuckDB, spaCy, torchxrayvision

- Building an **agentic multimodal diagnostic assistant** that fuses chest X-ray imaging, clinical lab values, and radiology text through an orchestrator-driven pipeline, belief-state tracking and cross-modality consistency checks.
- Linked **53,000+ chest X-ray studies** to their matching clinical and lab records using a custom timestamp-based join algorithm, then queried an 18GB+ lab-events dataset directly with DuckDB to avoid full in-memory loading
- Built and fused **three unimodal models** (MIMIC-CXR DenseNet, ClinicalBERT) into a multimodal classifier, improving validation macro F1 from 0.51 to 0.61, with SHAP and Grad-CAM explanations per prediction.

OneForAll Agent: Multi-Tenant Autonomous AI Task Worker | **GitHub** May 2026 – Sept 2026

Python, FastAPI, PostgreSQL, Playwright, Gemini API, SQLAlchemy

- Built an **autonomous browser agent** that completes multi-step business tasks safely, with no wrong/duplicate writes across **5 real-Gemini eval runs and 500+ automated tests**, by enforcing human approval in the runtime, using Python, Playwright and Gemini function calling.
- Turned it into a system that many teams can use at once, and when a server was deliberately **crashed mid-task**, all 4 running tasks resumed automatically, by adding user logins and roles, and a task queue with recovery.
- Validated the platform at scale, with **280/280 runs** passing ground-truth checks at **38.8 runs/min and 0 cross-org leaks across 47,508 responses**, by writing a load-test harness that simulates 6 orgs with injected failures, a worker crash and an API restart.

Technical Skills

Languages: Python, Java, JavaScript, MySQL, PostgreSQL, C
Frameworks & Libraries: Node.js, Express.js, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, APIs
AI/ML: LangGraph, LangChain, Machine Learning,Deep Learning,NLP,LLM, RAG, Generative AI, ChromaDB, Qdrant
Developer Tools: Git, GitHub, Excel, Power BI, Tableau, Claude Code, Hugging Face, Jupyter/Google Colab
Concepts: MLOps, DSA, Regression, OOP, DBMS, Operating Systems, REST APIs, Prompt Engineering

Education

Christ (Deemed to be University) Kengeri, BLR, KA

Bachelor of Technology in Computer Science (AIML) CGPA: 8.4/10 *Jul 2023 - Apr 2027*

St. George's School Alaknanda, DL

CBSE (12th - 88.8%) *Apr 2022 - Feb 2023*

Certifications

- **Anthropic Claude Code in Action** – Anthropic
- **AI Skills Passport** – EY and Microsoft
- **AWS Academy Cloud Foundations** – AWS Academy
- **Prompt Engineering** – Infosys SpringBoard
- **Generative AI: From Prompts to Partnership** – Linkedin Learning
- **Networking Essentials** – Cisco Networking Academy
- **Fundamentals of Operating System** – Scaler
